SUFFRAGE LEADER CALLED BY DEATH

Dr. Anna Howard Shaw Dies in Philadelphia at Age of 71 Years.

RELAPSE BRINGS QUICK END

Had Recovered From Illness on Lecture Tour, but Recurrence Is Fatal.

KNOWN THROUGHOUT WORLD

Had Spoken in Every State of Union; Had Waged Long Battle for Suffrage.

PHILADELPHIA, July 2.—Dr. Anna Howard Shaw, honorary president of the American Woman's Suffrage association, died at her home in Moylan, Pa., near here, at 7 o'clock this evening. She was 71 years old.

Dr. Shaw was chairman of the women's committee on the council of national defense and recently was awarded the distinguished service medal for her work during the war.

III on Tour.

She was taken ill in Springfield, Ill., several weeks ago while on a lecture tour with former President Taft and President Lowell of Harvard university, in the interest of the League of Nations. Pneumonia developed and after two weeks she was confined to her room in a Springfield hospital. She returned to her home about the middle of June and apparently had entirely recovered. Late Saturday she drove to Philadelphia in her automobile and upon her return said she was feeling fine. She was taken suddenly ill again yesterday with a recurrence of the malady and grew rapidly worse until the end.

Her secretary, Miss Lucy M. Anthony, niece of Susan B. Anthony, who has been with Dr. Shaw for 30 years and two nieces, the Misses Anna and Grace Greene, were at her side.

No arrangements for the funeral have yet been made. They probably will be announced tomorrow.

Long Prominent.

Dr. Shaw long had been prominently identified with the woman suffrage movement and was president of the National American Woman Suffrage association consecutive for 11 years. In 1915 she declined a renomination and was then elected honorary president. She had spoken in every state in the union before many legislatures and committees of both houses of Congress in the interest of suffrage. She was a member of the International Woman Suffrage alliance, International Council of Women, League to Enforce Peace and National Society for Broader Education.

Dr. Shaw was born in Newcastle-on-Tyne, in England, and was brought to America by her parents when 4 years of age.

HINES TO DISCUSS RAIL PROBLEM WITH PRESIDENT

WASHINGTON, July 2.—Problems facing the railroad administration will be among the first business laid before President Wilson on his return to Washington. Director General Hines plans to confer with the president next week, but stated he had no specific recommendations to make.

It is believed that increased freight rates will be the most important topic. With crop movements starting, it is expected that the next few weeks will determine whether an increase is to be made, administration already believing that a decision will be reached by September 1. Traffic experts are divided in their view, an advance in rates being recommended as a factor in which close attention is being given.

Plans for return of the roads to federal control constituted another subject to be taken up at the conference between Mr. Hines and the president. Suggestions for a return of the roads in the direction of the owner and user were made by salaried officials who argue that time should be given to reorganize local staffs before December 31, the date set by President Wilson when federal control is to begin.

Fight Returns

You hereby are invited to witness, in either heart—the Willard Company fight July 4 as well as the Tulsa fight.

The World will be connected direct with the Toledo single-line telephone system. Every telephone will be fastened to this office the instant it begins to ring, and will remain from the World building to the Willard avenue without delay.

The fight is scheduled to start at 1 p.m. and the World's megaphone service will include the fight.

Those who cannot come to the World building to hear these announcements, The World will broadcast them over the radio in every edition issued immediately upon the flash of the results.

We must vote the bonds.

SEES AIR TRAVEL TO EUROPE SOON

Regular Service Possible in Three Years, Commander Read Declares.

GO OVER AND BACK IN DAY

Takes Courageous Person to Dispute Possibility, NC-4 Skipper Declares.

DARING AIRMAN IS HONORED

Speaks at Dinner Given for Him by American Flying Club of New York.

NEW YORK, July 2.—Regular trans-Atlantic aerial travel would become a reality within three years if interest in aviation evident in time of war were continued in time of peace, declared Lieut. Cmdr. Albert C. Reed, skipper of the NC-4, at a dinner given here tonight by the American Flying Club in honor of the aviator who won the Americas cup for the Americans in the race around the first.

"He is a nuisance and a pest,"

the NC-4 skipper declared.

"Any one who says that we shall

never attain an altitude of 60,000 feet, that we shall never be able to cross to Europe in the forenoon and return in the afternoon, that we shall never be able to accomplish the things that appear impossible now, is a most courageous person, with a courageous mind to think in the often days when we say that trap ships would never work," asserted Commander Reed.

Planes Larger.

Describing his experience on his flight from Newfoundland to Lisbon, Commander Reed predicted that in the future long distance planes would be much larger than the NC-4, which has a wing spread of 70 feet and a length of 45 feet, the property to obtain greater efficiency in continuous drive of gasoline motors would solve much of the present engine trouble experienced on long flights.

Regarding the radio, the results obtained by the radio officer on the NC-4 undoubtedly broke many previous records, he said. He sent messages over 200 miles.

Where Do You Belong?

Those Who Are for Spavinaw Are the Men Who Have Made Tulsa What It Is Today—Are You With Them?

BY A SPECIAL CORRESPONDENT

The opposition in its anxiety to avoid a comparison being drawn as to the relative merits of Shell creek and Spavinaw are laying great stress upon Spavinaw being the only issue in this campaign. They know the absurdity of their position. They have asserted that Spavinaw, with 400 square miles of drainage basin and 4 inches of annual rainfall, does not have water enough to supply Tulsa. Then what about Shell creek with 28 square miles of drainage basin and 36 inches of annual rainfall? They have asserted that Spavinaw goes dry in the summer and have resorted to great expense and equivocation to get residents along the Spavinaw to sign untrue statements to that effect. Yet they never have contended that it is dry for more than a short time in the summer. Even this is positively untrue. Enough water flows down the Spavinaw in the dry months to supply a city of 100,000 people. But were their statements true, even then Shell creek, which has no flow, can for more than two months in the year, dry up, when the supply for the other 10 months must be derived from a reservoir. According to their own story, only a couple of months supply would ever need to be impounded at the Spavinaw.

Mr. Page has made his 8-cent-per-thousand-gallons offer for Shell creek water. But it could make out of the deal may have slightly influenced his attitude. This also directed attention to Shell creek and resulted in the engineer for the state board of health pronouncing it inadequate.

A very bad mistake was made in having Mr. Page make his 8-cent-per-thousand-gallons offer for Shell creek water. It revealed his motive in having his papers oppose the bond issue. The \$275,000 profit he could make out of the deal may have slightly influenced his attitude. This also directed attention to Shell creek and resulted in the engineer for the state board of health pronouncing it inadequate.

Now they seek to remedy the mistake. It is fair to presume that if a man had a water well and was debating whether to clean it out and use it or fill it up, the opposition would be consistent and tell him the only question before him for decision was what to do with the well. But it is this same question that the opposition asks.

Tulsa must come from the question of what she will do for water if she repudiates the bonds. The present supply will not do. Tulsa has the highest typhoid death rate in the state. Our citizens die because of bad water. If Mr. R. T. Daniel knew he would die from bad water he would probably prefer to pay his share of taxes for Spavinaw water and safety and that is to live in Los Angeles where they have spent \$28,500,000 for a water supply for him and his income producing property in Tulsa and fight the bonds. Then if somebody dies from bad water it will not be him, so why should he worry?

If one boy dies of typhoid due to bad water and that boy proves to your boy, will you let the economy in not voting the bonds be wise?

Common humanity demands that no case of preventable death shall occur in any unincorporated city. So if these bonds fail we must get good water somewhere right away. But where will that somewhere be?

Mr. Page has had the foresight to grab Shell creek. It is just as easy anyway, for the engineer for the state board of health says he would not allow Tulsa to go to Shell creek for water.

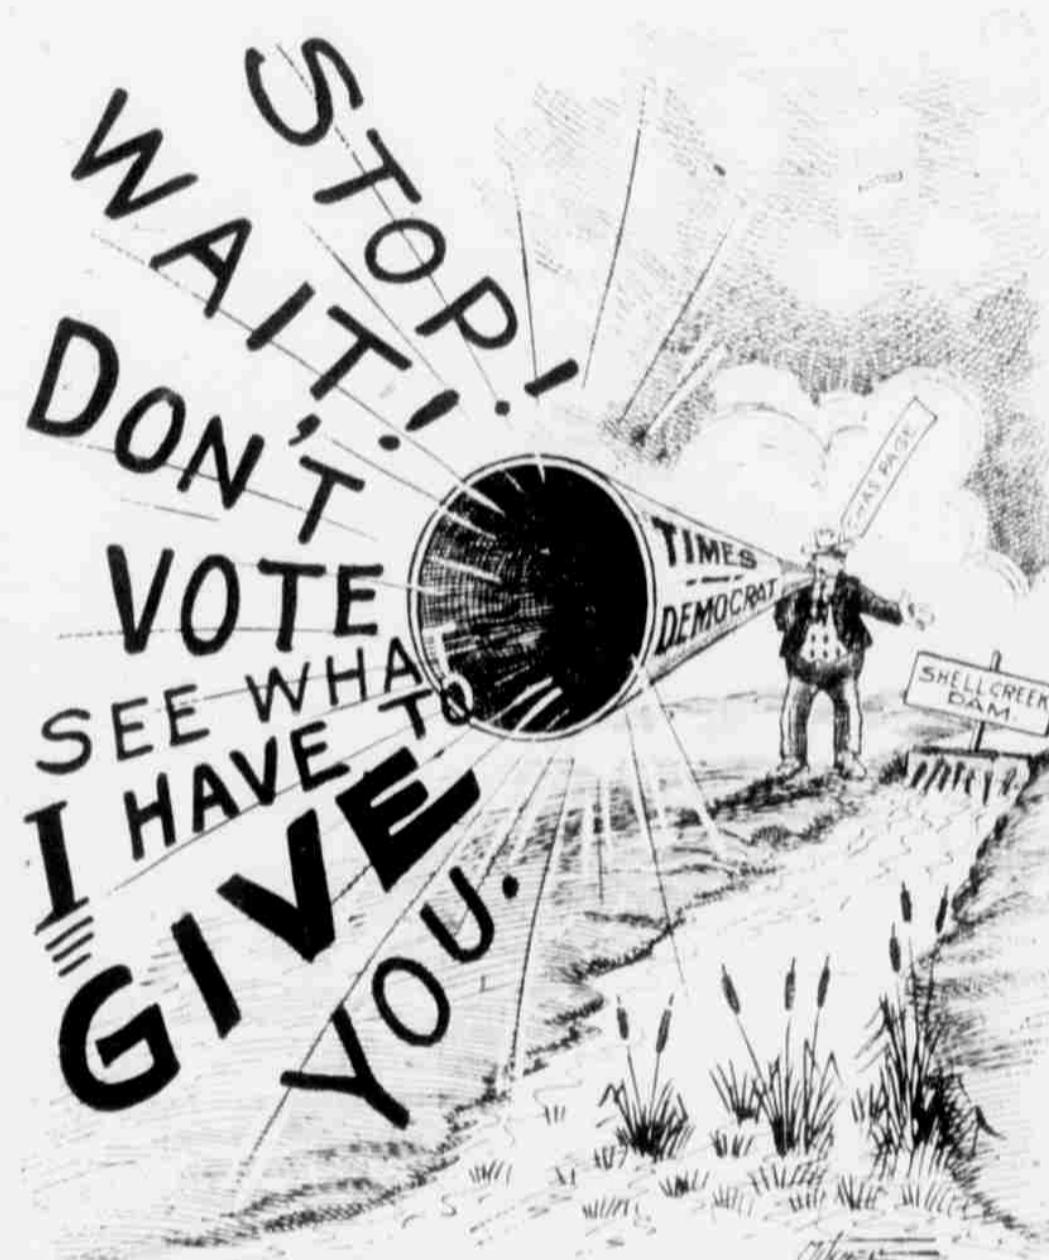

Where they would go? There would be only one answer and that would be "Grand River." But the Grand river project would cost within \$950,000 of as much as Spavinaw. The water would need filtration at 2 cents per 1,000 gallons. Spavinaw needs no filtering. Grand river would have to be pumped with fuel at an added operating cost of nearly \$100,000 per annum. Why in the world should we turn down pure Spavinaw for questionable water? But it is not decided to turn the money over to Spavinaw as equal to Grand river. They only talk Grand river because Spavinaw is to be buried upon. They only talk Grand river because Spavinaw would be for the Spavinaw. All their desire is to defeat any and all bond issues. They are for what Tulsa is not trying to do, because that will cost them nothing.

It is untrue that the only question before the voters is Spavinaw. The whole question of the source of our water supply is before us. The question of the health of the community is before us. The question of the future of Tulsa is before us. This vote determines all three. Men should be in deadly earnest in seeking to do their duty at this time. Those who have mislead Tulsa great are for this bond issue. Those who have retarded progress are against it. Where do you belong?

No one votes new bonds unless the money is to be used for something. If the men had prevailed you would be living somewhere else. When the men begin to prevail Tulsa bestows the wheels of industry begin to slow down, progress has the air-brakes on and bears down. The Tulsa spirit is affirmative, not negative; is progressive, not reactionary.

We must vote the bonds.

Much Ado About Nothing

Hubbard Gives Bottled Water Men Opportunity to Clean Up

Mayor Rescinds Order Ordering Nine of 10 Companies to Close Plants.

GET TWENTY DAYS OF GRACE

Another Analysis Will Be Made Then and Water Must Pass Tests.

Mayor Hubbard yesterday afternoon modified the order, ruling nine of the 10 bottled water companies in Tulsa off the market. He made the order to give the companies a chance to clean up and stand another 10 days.

According to the government survey of the oil and gas resources section 16 of the Osage district right in the heart of the Shell creek watershed, and in the future section number 16 Charles Page is drilling dry wells.

Also according to the analysis and the maps talked of Etchells creek area, there are five other locations for wells, four producing gas wells and two producing oil wells outside of the wells which Charles hopes to produce.

As you get the angle of a bit that would try to get by who will take this and then say, "Contamination is permanent?"

Page Is Drilling for Oil Right in Heart of the Shell Creek Basin

Can you beat this?

Charles Page is drilling, drilling for oil right in the Shell creek water shed. What do you think about it? Is that better?

After all the talk.

TO ARREST MEN WHO ATTACKED OPERATORS

O. U. R. Officials to Swear Out Warrants for Arrest of Eight Alleged Leaders of Riot.

NO SERVICE AT SAPULPA

Interurban Runs to Sapulpa but "Dead" Power House Prevents Going to Briefer.

No city service in Sapulpa has yet been inaugurated by the O. U. R. company, an promoter will not be able to run the lines until there is power there.

After the power plant was reopened Wednesday morning after having been stopped for 11 days Interurban cars stop at Sapulpa and each bid for an hour to Kiefer before the power plant is again in operation, according to a statement by L. F. Coker, secretary-treasurer of the company.

Although many senators left the capital today, some of the leaders remained actively at work on plans for the ratification fight. It was said on both sides that the final strategy of the situation would not be determined until the treaty actually was presented, but in general the opposition lines were shaping on the basis of the refutation of the various league opponents, and a tentative itinerary has been drawn up for a special train to carry senators to the Senate to accept the document without the alteration of a single provision.

A number of the opposition senators who left today are to make addresses on the subject during the recess, speaking against the measure in their states. This has been effective in the Senate, but in the House, where the debate is to be opened on the 15th, the opposition is preparing to accept the treaty.
